Advanced Records Processing

## IDENTIFY AND REDACT LANGUAGE IN LAND RECORDS

Identifying information in historical land records that is discriminatory, illegal, or contains personal information about individuals in public service can be a time-consuming and inefficient process. A process made more challenging, when the identified information needs to be redacted and the documents re-recorded.

Let Tyler Technologies' Advanced Records Processing solution do this heavy lifting for your office. This solution efficiently identifies documents needing revisions, provides suggested redactions, and, when the process is complete, sends the documents to your Enterprise Records Management solution for re-recording.

SOLUTION HIGHLIGHTS

The Advanced Records Processing solution adds efficiency to a seemingly impossible task. This purpose-built solution:

- Meets state-specific requirements.

- Is integrated with the Enterprise Records Management solution. Saving time and reducing manual work in your office.

- Is cloud-based, allowing seamless access to others in the county who are allowed to review records, like the legal department.

- Has added AI functionality to reduce false positives and the associated work to review them.

INTUITIVE WORKFLOW

This solution is effective and easy to use.
You can:

- Identify documents needing revision and see suggested redactions.

- Edit, approve, or reject a redacted document during your office's review.

- Streamline document review and approval process for your office, legal counsel, and others as needed.

- Have document control and approvals.

- Auto record redacted document.

Advanced Records Processing Workflow

FLEXIBLE OPTIONS

This solution can adapt to the changing needs of your office. You can:

- Easily define custom word and phrase search terms and revise as needed.

- Make additional redactions or redraw the suggested redactions.

TRUST IN TECHNOLOGY THAT DELIVERS

Streamlining tasks and better serving your constituents can be difficult without having the right tools in place. Having modern, reliable software to support your office's needs is important, especially in finding new ways to save time and effort when recording documents. You can trust in Tyler to support your needs, simplify your processes, and grant you an unparalleled level of access and control.
