State Firearms POC Background Check Software

LEVERAGE THE POWER OF A CENTRALZED STATE BACKGROUND CHECK SOLUTION

Implementing an integrated software solution for state firearms POC background checks improves the efficiency of the process and contributes to better compliance, accuracy, and security in handling sensitive information related to firearm transactions.

Tyler has an expansive footprint across state and local municipalities. Our Firearms POC Background Check Software can leverage and support these relationships connecting critical data points quickly and efficiently with intuitive interfaces that guide staff allowing them to work faster, more efficiently and with greater transparency.

ADVANTAGES TO STATE AGENCIES

- Retires legacy paper processes, increasing time and cost savings
- Enhances accuracy by automating workflow and data input
- Cost-effective flexible funding model available to reduces risk
- Minimizes response time for non-flagged applications to real-time
- Intuitive interfaces that guide staff allowing them to work faster, more efficiently and with greater transparency

KEY PLATFORM FEATURES

- Web-based Saas solution built for POC state integrations
- Configurable to fit within any state agency's existing infrastructure
- Streamlines workflow between OMV, state financial systems, federal NICS, and agency integrations

Our Comprehensive Solution Streamlines Your Workflow

State Financial System Integration

SSO Integration → Applicant Validation → Secure Payment Processing → Query NICS

1 FBI NICS
2 State Police
3 Local Police
4 DMV Integration

Query State Databases

Appeal Procedure ← Simple Approval or Denial Process ← Notification for Review

...continued on back

tyler technologies

Tyler has experience with cross-agency integration in public safety. This facilitates transparency, promotes collaboration, and delivers efficiencies among agencies involved in the background check process such as law enforcement, criminal justice agencies, and relevant government departments. A comprehensive online solution fosters a more coordinated approach while eliminating human error and backlog that can occur with manual processes.

ONE PLATFORM SUPPORTING MULTIPLE MODULES

Centralized Data Management:
- Applications for dealerships to submit NICS check request
- Automation of background checks with required federal and state databases
- Administrative site for dealerships and state users to manage and track applications in real-time

Scalable for Recertification:
- Pistol permits such as Carry Concealed, Possess on Premises, Possess for Employment
- Semi-Automatic Rifle Licenses and Assault Weapon Registrations
- Administrative site police departments to manage and track permits

Cross-Agency and Dealership Integration:
- Firearm dealers can easily register to use the integrated online background check solution.
- Administrative site for state users to manage, track, and disable firearm dealers as needed

SEAMLESS, EFFICIENT, AND INTEGRATED WORKFLOW

Single Sign On (SSO):
- Provided or integrated SSO to manage accounts and credentials
- All users of the application are required to create and maintain an account for access to the application.

Secure Payment Processing:
- Seamless integration and processing of all payments
- Customized analytics and reporting tailored to the needs of the state
- Integrate with the state financial system

Third Party Integrations:
- Access to integrate and follow state and federal guidelines and standards as well as the ability to collaborate with third parties including IVR, phone, and customer support
- API integration with retail dealerships Facilitates quicker, more efficient background checks ensuring compliance and safety

CLIENTS

Join the growing number of states who have entrusted their Firearms POC Background Checks processes to Tyler Technologies.
