Field Inspector

COLLECT FIELD DATA IN REAL-TIME

Input data securely into the system on an authorized mobile device.

CONNECT INFORMATION TO CASES

Replace paper-based records with data tied directly to the licensee or claim.

STREAMLINE RECORD KEEPING

Data is easily stored, searched, and used for reporting.

The Field Inspector module gives regulators a digital alternative to disconnected and non-secure paper case files, notes, and other field inspection tools. Field Inspector's intelligent risk-profiling, task automation, and optimized interface simplifies and accelerates inspections so agencies can make sure licensed businesses and licensees are following state laws and industry regulations.

CAPTURE INSPECTION DETAILS EASILY

Field Inspector is highly intuitive, enabling inspectors to quickly access any aspect of their work such as reviewing past actions, evaluating route options, or diving straight into field inspections. Guided by an array of smart tools and AI assistance, inspectors are able to achieve high-quality, consistent, and thorough inspections with 100% assessment completion and follow-up rates.

- Automated pre-inspection information collation
- Pre-configured checklists as per compliance regulations
- Bulk selection and error handling
- Zero-duplication smart forms with contextual insights
- 360° evidence capture – photos, videos, voice, scanner, annotations
- Offline mode with auto download and sync
- Auto generated reports and violation citations
- Automated post-inspection communications

There is no need to go back to the office and file a report; in those instances when there is no cell reception or internet connectivity, Field Inspector enables team members to continue working as normal and will automatically upload the data as soon as it reconnects to a network.

STATE REGULATORY MODULE

Field Inspector is an optional module available with Tyler's State Regulatory Inspections application, or as part of a full State Regulatory Platform Suite implementation.

100% FOCUSED ON THE FIELD

- AI/ML driven risk profiling
- Highly optimized mobile app
- Self-service client portal
- Agency admin web portal

FREE UP TIME FOR GREATER OVERSIGHT

Field Inspector is guided by an intelligent wizard that assigns risk scores, prioritizes sites, and grows more intelligent with use, all while automating and streamlining work. The impact is dramatic, enabling agencies to scale inspection frequency to previously inconceivable rates.

By analyzing historical site and census data, past inspections, violations, and more, Field Inspector expertly guides operations. This not only assists inspectors on-site, but also helps identify potential dangers to the community.

MONITOR AND REFINE OPERATIONS

Field Inspector seamlessly integrates with Tyler's Inspections application, allowing agencies to gather critical compliance data, streamline oversight and interactions with regulated entities, and enhance execution in the field.

Customizable analytics dashboards provide data-rich visualizations that empower managers to identify trends, prioritize inspections, and enhance operations. The module also provides management of users, inspection types, checklist management, and reference materials.
